

UI/UX & System Design Document

1. UI/UX Design, Layout & Structure

Design Approach

The application will follow a **clean, minimal, and user-friendly design** focused on simplicity and accessibility. The interface will be responsive and consistent across devices.

Design Principles

- Simple and intuitive navigation
 - Consistent color scheme and typography
 - Responsive design (mobile + desktop)
 - Clear visual hierarchy
 - User-centric layout
-

Layout Structure

Navbar

- Logo (Roomzy)
- Navigation links (Dashboard, Match, PMS, Profile)
- Notifications icon
- User profile

Sidebar

- Dashboard
- Intelligence Lab
- Neural Match
- PMS
- Settings

Main Content Area

- Dynamic content based on selected feature

Footer

- Links (About, Contact, Help)
-

2. Core Features of the Application

Intelligence Lab

- Goal tracking system
 - Skill development roadmap
 - Leaderboard system
 - Mentorship and networking (Orbit & Hive)
 - Mental wellbeing support
 - Internship and project opportunities
-

Neural Match

- Hostel filtering (location, gender, budget)
 - Compatibility-based roommate matching
 - Interest-based matching system
 - Map integration (nearby facilities)
-

PMS (Property Management System)

- Room allocation and occupancy tracking
 - Payment and revenue management
 - Entry/exit records
 - Complaint and maintenance system
 - Admin dashboard
-

3. Flow of Information on Each Page

Login/Register Page

- Input: User credentials
 - Output: Authentication → Redirect to dashboard
-

Dashboard

- Input: User data from backend
 - Output: Display goals, progress, recommendations
-

Profile Page

- Input: User details (skills, interests)
 - Output: Updated profile stored in database
-

Neural Match Page

- Input: Filters (location, preferences)
 - Output: List of matching hostels and roommates
-

PMS Dashboard

- Input: Property data (rooms, payments)
 - Output: Reports, occupancy stats, analytics
-

4. User Navigation Flow

1. User lands on **Login/Register Page**
 2. After login → redirected to **Dashboard**
 3. From Dashboard user can:
 - Access **Intelligence Lab** (goals, mentorship)
 - Go to **Neural Match** (find hostel/roommate)
 - Access **PMS** (if admin/owner)
 4. User can update profile anytime
 5. Navigation is handled via **navbar/sidebar**
-

5. Tools & Technologies

Frontend Tools

- [Locofy.ai](#)
 - Figma AI / Galileo AI
 - Uizard / Framer AI
-

Conclusion

The application is designed to provide an integrated platform combining student development, smart accommodation matching, and efficient property management. The UI/UX focuses on simplicity, accessibility, and seamless navigation to enhance user experience.
